

DDOT Statewide Transportation Improvement Program (STIP) Policy

Policy:

The District Department of Transportation (DDOT) is the State Department of Transportation (DOT) for the District of Columbia. Each state DOT is responsible for developing its own State Transportation Improvement Program (STIP). The STIP is a list of federally funded transportation projects proposed for funding under Title 23 USC 135 and 49 USC 5304 which covers a period of at least four years. Federal regulations 23 USC 135 and 49 USC 5304 require each State to carry out a continuous, cooperative and comprehensive statewide multimodal process, including development of a Long Range Transportation Plan and a STIP which shall facilitate the safe and efficient management, operation and development of the surface transportation system. The STIP also includes regionally significant projects that may not be federally funded. A regionally significant project is generally defined as a project or a facility which serves regional transportation needs. It will also serve the mobility needs and freight including accessible pedestrian walkways and bicycle transportation facilities. DDOT is committed to servicing the public by adhering to this program and achieving an exceptional quality of life in the nation's capital through more sustainable travel practices, safer streets and outstanding access to goods and services.
